

# Energy Technology and Governance Program (ETAG)

## Semi-Annual Recap

MARCH - AUGUST 2020

### Energy Technology and Governance Program (ETAG)

*Semi-Annual Recap*

**Overview**  
ETAG supports development of robust, interconnected electric and natural gas networks providing the backbone infrastructure for competitive and transparent cross-border energy trade among countries in the Europe and Eurasia region and, between the region and the European Union.

---

*March, 2020*

---

#### The Journey to Self Reliance Begins Here

*Tirana, Albania*

The USAID/USEA Eastern Europe Natural Gas Partnership is training engineers to model and analyze the pipeline infrastructure needed to diversify Eastern Europe's natural gas supply.

---

#### From the Generosity of the American People

*Tirana, Albania*

The USAID/USEA Energy Technology and Governance (ETAG) Program provided 11 distribution system operators of Southeast Europe with training and network planning software. They will use it in cooperation with ETAG to improve network resilience and to plan for the integration of distributed, renewable generation.
