RFP – SYSTEM STABILITY AND RELIABILITY STUDY – PROSPECTIVE STATE – ELECTRICITY TRANSMISSION NETWORKS OF TAJIKISTAN

QUESTION: To our understanding, we cannot submit our proposal for the above referenced project since the authorized geographic code is 937. This code does not allow consultants from Advanced Developing Countries, including COUNTRY A where we are based, to submit their proposals. Ergo, we kindly request you to consider changing the geographic code of this project to 935.

ANSWER: We are unable to change the authorized geographic code for this project. However, if your proposal is selected for this project, we will apply for a waiver to authorize procurement. Unfortunately, waivers have a lengthy process, estimated at 3 to 6 months, and we cannot provide any guarantees that a waiver will be granted. Please consider carefully whether you would like to proceed with developing and submitting a proposal under these conditions.
