

Axio360 — 4 critical viewpoints for effective cyber risk actions

Cyber Risk Management Information System

1 What's my exposure in financial terms? Cyber Risk Quantification

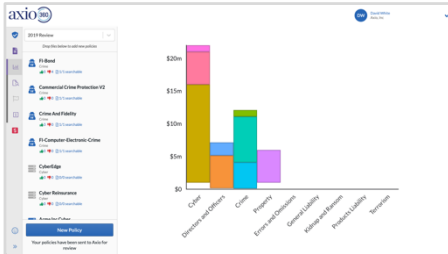

- Transparent, collaborative risk modeling
- Accurately quantify risk in hours, not months
- Brainstorm support eliminates blind spots

2 Is my cyber program maturing as needed? Cybersecurity Planning & Management

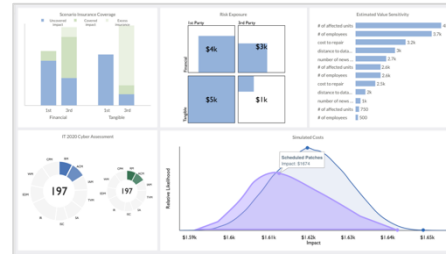

- Ongoing assessment
- Internal and external benchmarking
- Improvement planning and tracking
- Rich reporting
- C2M2, CSF, CMMC, CIS20

3 Do I have the financial ability to recover? Insurance Stress Testing

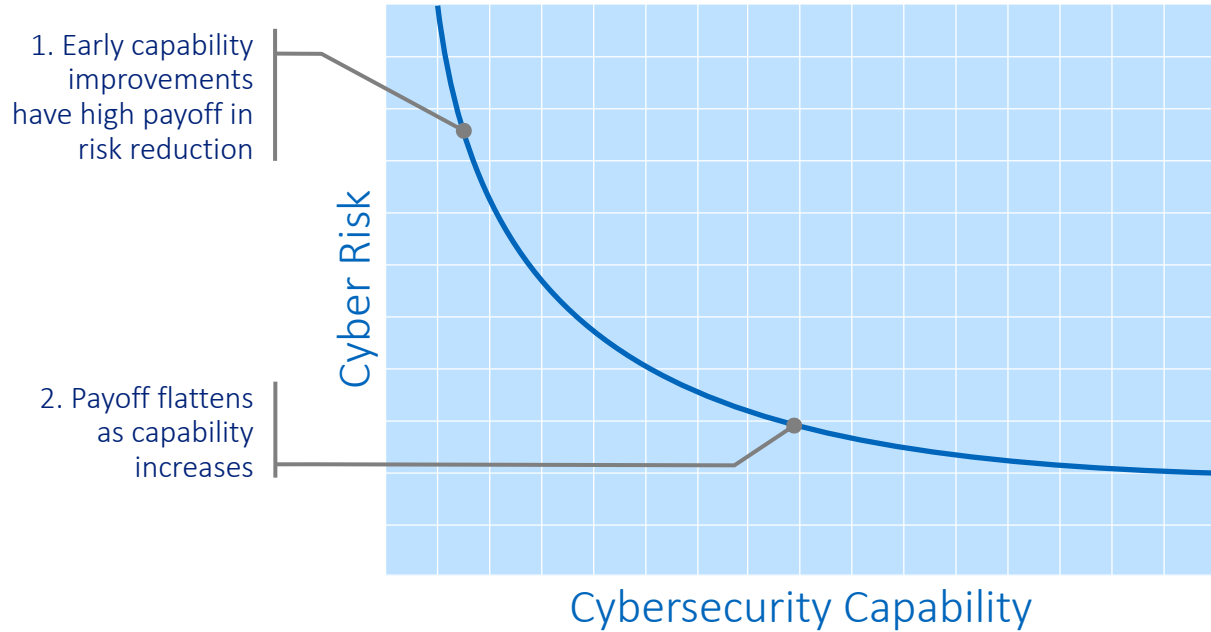

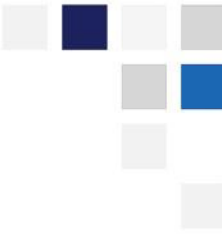

- View cyber coverage across full insurance portfolio
- Evaluate coverage limits and coverage triggers
- Identify problematic exclusions and limitations

4 Where should I invest to reduce risk? Control Initiatives

- Quickly model the effect of control changes to impact and susceptibility
- Compare controls to optimize selection
- Claim and track risk reductions

Putting it all together — prioritize using the risk curve
