LEVERAGING INNOVATION TO BECOME AN ENERGY EFFICIENCY SUPERPOWER

The United States is now an energy superpower: number one in natural gas production and soon to be number one in oil production. But what will it take for us to be an energy efficiency superpower? We have made great strides over the last 25 years, but other countries still rank higher when it comes to energy efficiency. What will it take to close the gap? Come hear how innovations in technology, policy and business models are already propelling us toward that goal.
