

Deep Dive Workshop at the 10th ADB Asia Clean Energy Forum

Variable Renewable Energy (vRE) Grid Integration: Issues, Enabling Policies, and Finance Measures

GET INVOLVED!

About

16th June 2015 | 9 am – 5:30 pm | Venue: ADB, Manila

The rapid growth of renewable energies in Asia, especially solar and wind power, increases the challenges of incorporating variable renewable energy generation into power systems throughout the region. The **USAID-GIZ-Clean Energy Ministerial** deep dive workshop will foster exchange of experiences among Asian countries to address these challenges and identify policy mechanisms and tools, such as the **Grid Integration Toolkit**, to support the grid integration of renewables in Asia.

Speakers

Listen to high level speakers, including

- **ASEAN Perspective on vRE grid integration**
Dr Sanjayan Velautham (ASEAN Center for Energy)
- **Challenges and key aspects of grid integration of vRE**
Jaquelin Cochran (National Renewable Energy Laboratory)
- **Transformation of energy systems for high shares of vRE**
Christoph Menke (Joint Graduate School of Energy & Environment, Bangkok)

Lessons learnt

Learn from South-East Asian countries

India

Philippines

Thailand

Interactive group work

Share your experience in the group discussion on

Group 1: Transmission Planning, including Smart Network Technologies

Group 2: Grid Connected PV - Technical and Regulatory Solutions

Group 3: Procuring RE and Flexible Generation

Country specific-advisory support

Meet the experts and get further assistance

Experts will be available to meet with countries to identify opportunities for country-specific advisory support on policies for grid integration and strategies for investment mobilization. The **Clean Energy Solutions Center** and **Asia LEDSPartnership** are offering support of further cooperation.
