

Opportunities for Energy Communities in the Biden Administration & Through the Bipartisan Infrastructure Law

Regional Carbon Management Workshop - April 7, 2022

Interagency Working Group (IWG) on Coal and Power Plant Communities and Economic Revitalization

- The Interagency Working Group (IWG) was established by [Executive Order 14008](#), Sec. 218, on Jan. 27
- The IWG released an [Initial Report](#) with recommendations to catalyze robust economic activity and support workers in America's energy sector

Initial Report to the President on Empowering Workers Through Revitalizing Energy Communities, Released April 23, 2021

Prioritizing Those Most In Need of Support

- Identified 25 priority Energy Communities
- Coal communities identified as immediately challenged
- **Work now expanding into oil & gas communities**

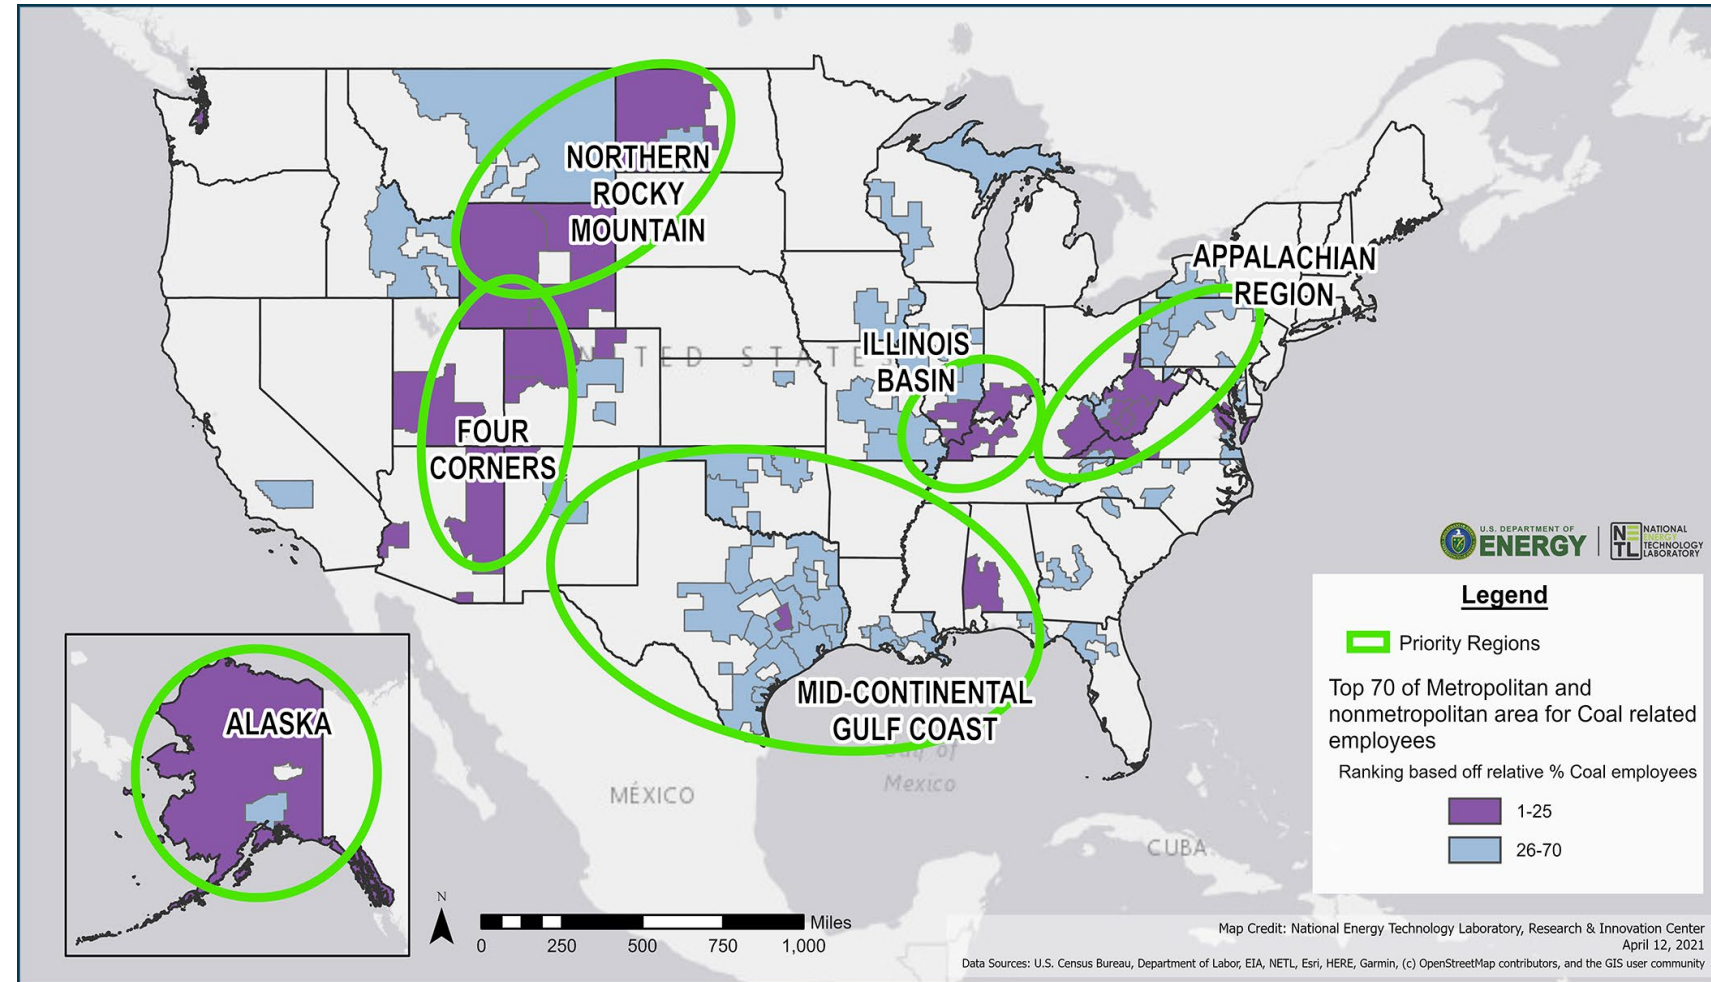

Figure 2 in the report. The IWG recommends focusing initial federal investments in areas with high concentrations of coal-dependent jobs.

Key Learnings from Energy Communities

- Need to **think ahead**: “Plan for transition or be run over by it.”
- **Economic diversification** is as important as energy transition.
- Every community brings different challenges and opportunities.
 - There is **no “one size fits all”** approach to energy transition.
 - There are **no “silver bullets”** or 1:1 industry replacement.
- Meaningful **community engagement** matters.
- Need for immediate **high-quality** jobs, equitable access to these jobs, AND long-term economic strategies.
- Basic infrastructure matters: **transportation, transmission, workforce, water.**

Bipartisan Infrastructure Law – DOE Programs

<https://www.energy.gov>

<https://build.gov>

The screenshot displays the Energy.gov website. At the top, there is a navigation bar with social media icons (Facebook, Twitter, YouTube, Instagram, LinkedIn) and links for 'About', 'Leadership', 'Offices', and 'National Labs'. Below this is a green header with the 'ENERGY.GOV' logo and a menu with 'SCIENCE & INNOVATION', 'ENERGY ECONOMY', 'SECURITY & SAFETY', and 'SAVE ENERGY, SAVE MONEY' (with a lightbulb icon). A search icon is also present. The main content area features a large banner with the title 'Bipartisan Infrastructure Law Programs' overlaid on a collage of images showing people working on infrastructure projects. Below the banner, the text reads: 'Energy.gov » Bipartisan Infrastructure Law Programs'. The main body of text states: 'For the next five years, the Bipartisan Infrastructure Law will stand up 60 new DOE programs, including 16 demonstration and 32 deployment programs, and expands funding for 12 existing Research, Development, Demonstration, and Deployment (RDD&D) programs. DOE looks forward to being a partner for states, communities, and industry as we move the U.S. economy towards a clean energy, lower carbon emissions future by strengthening the nation's outdated energy infrastructure.' At the bottom left of the main content area, there is a link that says 'HAVE QUESTIONS?'. On the right side, there is a blue box with the heading 'More Information' and the text 'Learn more about the Bipartisan Infrastructure Law and the Department of Energy'.

Clean Energy Demonstrations

The deal will provide **\$21.5 billion** in funding for clean energy demonstrations and research hubs, including:

- **\$8 billion** for clean hydrogen
- More than **\$10 billion** for carbon capture, direct air capture and industrial emission reduction
- **\$2.5 billion** for advanced nuclear
- **\$1 billion** for demonstration projects in rural areas and **\$500 million** for clean energy demonstration projects on current or former mine lands

Delivering Reliable, Clean, and Affordable Power to More Americans

Bringing the electrical grid into the 21st century

- Invest **\$11 billion** in grants for states, tribes, and utilities to enhance the resilience of the electric infrastructure against disruptive events such as extreme weather and cyber attacks
- Establish a **\$2.5 billion** Transmission Facilitation Program for DOE
- Back a **\$3 billion** expansion of the Smart Grid Investment Matching Grant Program

Maintaining our existing clean generation fleet

- Allocate **\$6 billion** for the Civilian Nuclear Credit program to prevent premature retirement of existing zero-carbon nuclear plants
- Invest more than **\$700 million** in existing hydropower facilities

Investing in American Manufacturing and Workers

Revitalizing domestic supply chains and America's manufacturing leadership

- Invest more than **\$7 billion** in the supply chain for batteries
- Provide an additional **\$1.5 billion** for clean hydrogen manufacturing and advancing recycling RD&D
- Create a new **\$750 million** grant program to support advanced energy technology manufacturing projects in coal communities
- Expand the authority of DOE's Loan Program Office

Investing in America's workforce

- Requires all construction workers on projects funded by the BIL to be paid prevailing wages
- Invests **hundreds of millions** in workforce development
- Establishes a multi-agency Energy Jobs Council

Expanding Access to Energy Efficiency and Clean Energy

- Invest **\$3.5 billion** in the Weatherization Assistance Program that will reduce energy costs for low-income households by hundreds of dollars every year
- Invest **\$500 million** to provide cleaner schools for our children and teachers
- Invest **\$550 million** in the Energy Efficiency and Conservation Block Grant Program and **\$500 million** in the State Energy Program to provide grants to develop and implement clean energy programs and projects that will create jobs

BIL Programs Especially Relevant

- **For specific geographies–**
 - \$1 billion: Energy Improvement in Rural and Remote Areas
 - Funding available for communities of less than 10,000 people.
- **For communities in energy-producing or mining areas–**
 - \$500 million: clean energy demonstration activities on current or former mine land
 - \$750 million: advanced energy manufacturing or recycling, or reducing emissions from industrial facilities in communities with retired coal mines or power plants
 - \$140 million: demonstration facility producing rare earth elements from waste material
 - \$6 billion: battery materials processing and battery manufacturing and recycling

BIL Programs Especially Relevant

Program Name	Funding Amount	Next Milestones
R&D to Support Orphan Well Plugging	\$30,000,000	More information will be released Spring of 2022.
Clean Energy Demonstration Program on Current and Former Mine Land	\$500,000,000	Estimated application opening date, 2023.
Critical Materials Supply Chain Research Facility; Innovation, Efficiency, Alternatives	\$675,000,000	More information will be released Spring of 2022.
Rare Earth Demonstration Facility; Rare Earth Mineral Security	\$267,000,000	Request for Information open until 3/31/2022
Advanced Energy Manufacturing and Recycling Grant Program	\$750,000,000	More information will be released Spring of 2022.
Battery Material Processing Grants; Manufacturing and Recycling Grants	\$6,000,000,000	Notice of Intent issues 2/10/2022; estimated application opening spring/summer 2022

Fossil Asset Repurposing

- *Key Strategy for Energy Community Revitalization*

Options for Repurposing Fossil Assets

- **Built-in infrastructure and components can be repurposed for new industry:**
 - Transportation: access to roads, rail, ports and waterways
 - Transmission: Pre-existing direct grid connection at the power plant
 - Water: existing access and water rights
- **Options for Conversion to Clean Energy Assets:**
 - Nuclear (SMRs and Microreactors)
 - Hydrogen
 - Battery Energy Storage System (BESS)
 - Solar and Wind
 - Thermal Energy Storage (TES)
 - Carbon storage
 - And more...

Examples of Repurposed Fossil Assets

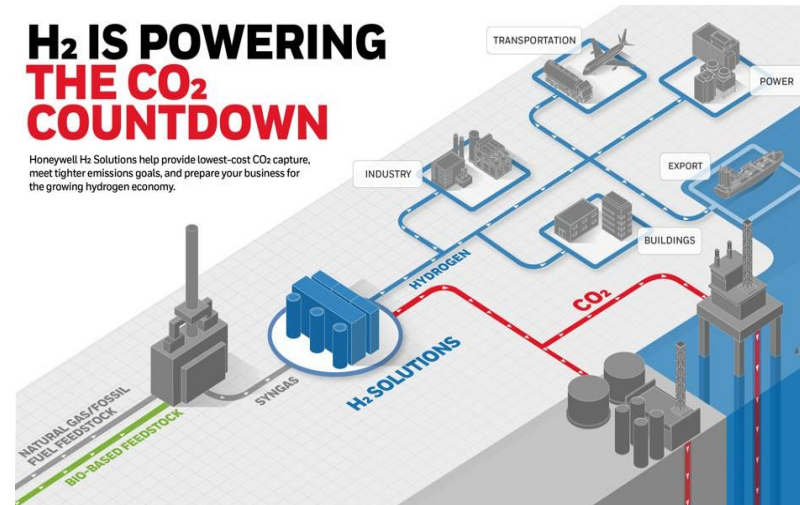

Mockup of the TerraPower 345 MW nuclear demonstration project: A former coal generation site in Wyoming.

ENGIE North America and Holyoke Gas & Electric: The largest energy storage system (with solar) in Massachusetts, located at the site of the old Mt. Tom power plant.

The Powerhouse Eatery: A former coal powerplant turned into a restaurant in Pennsylvania.

Former gasification plant in West Terre Haute, Indiana: Wabash Valley Resources and Honeywell are converting the plant into a hydrogen facility. The fuel will be sold to power generators and chemical makers.

Thank You!
