USEA/USAID Global Energy Efficiency Workshop Energy Efficiency Action Plan

The objective of the Action Plans is as follows:

-  To recommend actions for implementing energy efficiency, energy conservation, and demand-side management programs for the participant's country.
-  To create a set of specialized recommendations that will best motivate consumers, businesses, government, and utilities to implement or improve energy efficiency programs.

Preparation of Energy Efficiency Action Plans:

Using the attached format, each county's delegation will develop an Action Plan comprised of specific recommendations to policymakers, the participants' own organizations, electric utilities, and utility regulators. Following a short breakout session, participants will be provided access to computers to draft their Energy Efficiency Action Plans. In preparing their Action Plans, participants should consider possible recommendations with regard to the following subject matter:

-  National and Local Policies
-  Incentives and Targets
-  Improved Regulations
-  Improved Technologies
-  Financing
-  Marketing and Consumer Awareness Programs
